Terms of delivery	The standard delivery option for airfreight is freight term No. 02. Customs costs by "low value" for non commercial goods (no resale) are included.				

* Weight for airfreight shipping is calculated on base of volumeweight or real weight (higher calculated weight is taken)
Volumeweight: Length x Width x Height in cm / 6.000.

** For some countries out of this list additional fees are added. See "Part 3/Zones Overview" for more information

***Aside the standard airtraffic shipping price freight forwarders ask for compensation of price increase of fuel. That additional charge is updated monthly.
If you add 10% to the base price you are on the safe side. The rates do not differ massively from month to month.

Fuel charges at airfreight: DPD GeoPost (Germany) adds a fuel charge which orientates on the average spot market price for Kerosine/Je fuel published by the State Ministry of Energy of the United States. A monthly adaption is made.
(May 2007 -> 7.1% is being added to shipping pricing)
DPD GeoPost (Germany) adds a diesel surcharge on base of a monthly index (DESTATIS, Verbraucherpreisindizes).
(May 2007 -> 2.6% is being added to shipping pricing)

BlauPrint™ size and weight specifications for shipping in worldwide / Airtraffic by DPD Parcelservice

Shipping boxes are specially 100% wood made for means of high stability at less volume to guarantee the content not to get damaged even in case of bad handling.

(The standard card board box of size XL would be nearly 24.0 kg volumeweight so we shrank the parcel's size by using wood instead of card board to optimize shipping costs for you. The small extra charge for the wooden shipping box version does pay easily.)

Only single piece shipping by standard!

Size M (31x45cm): The volumeweight of one M-sized frame in the wooden shipping box is 2.0 kg.
No additional charges for wooden package version. *Example -> USA: 48.00 EUR + 9.7% (fuel charges) = 52.66 EUR*

Size L (70x56cm): The volumeweight of one L-sized frame in the wooden shipping box is 5.0 kg.
4 EUR additional charges for wooden package version. *Example -> USA: 61.80 EUR + 9.7% + 4.00 EUR = 71.79 EUR*

Size XL (80x100cm): The volumeweight/real weight of one XL-sized frame in the wooden shipping box is 11 – 12.0 kg.
6 EUR additional charges for wooden package version. *Example -> USA: 96.80 EUR + 9.7% + 6.00 EUR = 112,19 EUR*

Other sizes or bundling of several pieces or formats on request.

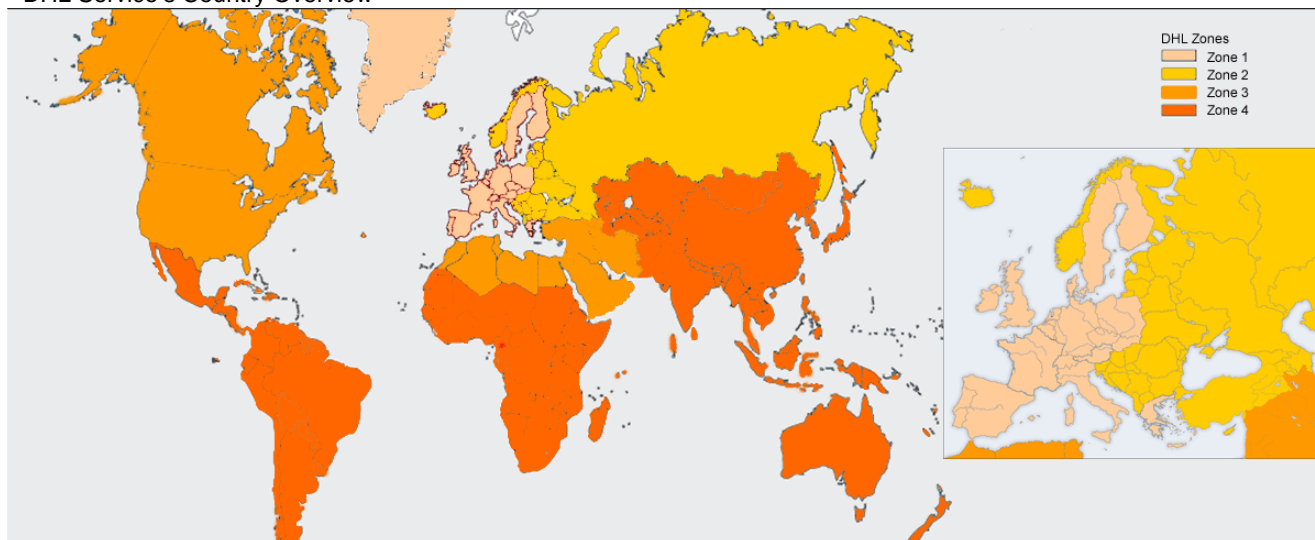

The boxes are optimized in weight and stability. 9mm strong wood as frontcover shelters the print. Hollow drilled sides and a lighter 4mm wooden backside keep the real weight under volume weight for best economy. The frame itself inside the box is wrapped in 4mm foam foil.

Worldwide Shipping with BlauPrint™ (dated May 2007)

Part 5: Special Services

Aside the standard shipping by DHL and DPD we offer transport of large frames by airfreight, roadtraffic and seaway according to your needs.

At DPD's size restrictions you end up 80x105cm framesize, at DHL at 73x110cm.

Bigger sizes up to 300x200cm are possible to be packaged stable and can be shipped in one piece frame.

It is not possible to list up estimated prices for that as destinations, sizes and shipping time do vary that much.

Please feel free to contact us with a detailed request and we will offer the best option and get a quote for you at our forwarding partners.

We can also build up the frame and stretch the print directly at your exhibition place: Sizes up to 400x700cm were done, yet and if you need it larger we will do it.
